Iris Lovers! Here's My "Blue-Book" of the World's Finest Tall Bearded Iris

In Society, the Social Register, often called "The Blue Book", records only the names of those who are recognized as the ELITE. Many of these social leaders come to me for Iris and other planting material of superior quality.

It is my policy to offer only the best and finest. Each year, for many years, I have selected the varieties for this List with the most exacting care.

SELECTED AS CAUTIOUSLY AS PRECIOUS JEWELS

As a lapidarian studies, weighs and tests each stone to be used in a beautiful piece of jewelry, so I have examined every variety of Iris used in this collection for size, color, form, texture and flowering habit. Only those varieties rating high on all counts have been accepted.

Every year, I compare every variety on my Master List with recent introductions. Should a better variety become available of similar color, the older variety is dropped and the new one substituted.

MY 1937 MASTER LIST THE FINEST EVER OFFERED

The varieties described on the following pages make up the finest Master List I have ever offered. Many of the new varieties included are startling in their size and brilliance.

For example, there is Red Radiance which received Honorable Mention by the American Iris Society. San Francisco, winner of the Dykes Medal, now offered by me for the first time at the amazingly low price of 25c, Dauntless, Depute Nomblot, also winners of the Dykes Memorial Medal, highest international honors, given to only one Iris each year in England, France and America. Also several marvelous French introductions: Henri Riviere, a lovely blend of delicate shades; President Pilkington, which received an Award of Merit from the French National Horticultural Society, and many other equally fine varieties.

MY PLANTS AS FINE AS THE VARIETIES

I give close attention also to the size and quality of plants. Nowhere in the world are finer Iris plants grown than in my Long Island Iris fields. The plants I ship are of great size, strong and healthy.

If you are a real Iris lover, you will probably want this complete Collection of the World's Finest Bearded Iris. If you already have many of these varieties or must compromise with your garden budget, you can modernize your collection at very small outlay by making selections from this Master List.

For best results, Tall Bearded Iris should be transplanted in mid-summer while growth is quiescent. Therefore, I urge you to send your order now.

The World's Finest Oriental Poppies

In ancient times the Oriental Poppy was dedicated to the Goddess Ceres, who, holding a lighted torch in one hand, and a Poppy blossom in the other, was said to keep watch over and carefully guard their fields and crops. Nothing is more showy or more durable in the garden than the modern hybrid Oriental Poppies, but to be sure of getting the finest stock one must procure plants that are grown from root divisions of the original hybrid, and not seed grown plants. All plants offered by me are strong field grown plants from authentic root divisions of the original hybrid. Once planted they will grow more beautiful and more gorgeous with each succeeding year.

While many seed grown Poppies are sold, it is a fact that many of the finest hybrids never produce seeds and those that do never come true from seeds. Therefore, I do not sell any seed grown plants.

Nothing is easier to grow than these gorgeous Oriental Poppies. The secret of success is planting them at the proper time. Spring plantings are usually doomed to failure but they may be safely planted after they become dormant from July until early Fall. It is best to place your order now, while you have it in mind, and I will send them just at the right time for best results. (Those who visit my gardens may procure pot grown plants at any time at double the price of dormant roots, but I never attempt to ship these pot grown plants.) Orders should be placed at once to assure success.

This collection of "The World's Finest Oriental Poppies" leaves nothing to be desired; most of the varieties listed are very rare. Planted either singly, or in small groups, or masses, they add a touch of barbaric splendor to any garden and never fail to arouse the admiration of all who see them.
